

Hello! Time to lighten up!

Just when you thought it was safe to open your e-mail, here comes another newsletter. Why? Because our world is turning greener.

Because you've told us you're interested in learning more about the sustainable advances in translucent daylighting techniques. Illuminated walls. Polycarbonate technology.

Once a month, we'll alert you to new technology, new products, new projects, new applications.

Right now, we'd like to alert you to our new look. The logo below visualizes Duo-Gard's dynamic new possibilities in translucent technology.

It's complemented by a new tagline: Art. Science. Possibility. Duo-Gard Design.

Because that's what Duo-Gard's designers, engineers, project managers and production specialists do.

We integrate creativity and technology to help you realize all the possibilities in your design. And isn't that what it's all about?

We'll be eager to know what you think! Of course, if you'd rather be left in the dark, just unsubscribe. We hope you won't. At least, not until after the first issue! Then if we bomb, you can click. Right now, you can click on www.duo-gard.com to learn more.

While you're there, please visit our exciting new illumaWALL section!

Sending you our sincere wishes for a great year,

David Miller, President
DUO-GARD INDUSTRIES INC.
