

Duo-Gard Translucent Interior Wall Systems

SERIES 1500 – TIW Tongue & Groove

Aesthetics – Continuous Flowing Facade

System Summary

- Interlocking tongue & groove continuous façade without mullions or visual breaks
- Low-profile aluminum perimeter base with snap-cap for easy installation
- Horizontal configuration for smooth radius in curved walls
- Vertical or horizontal configuration for radius around tight corners
- No visible fasteners
- Varying light transmission, depending on glazing tint
- Easy installation for reduced costs
- Demountable as desired

Glazing Options

- Opal, crystal, blue, green, bronze PCSS
- Interlocking 10mm or 20mm tongue & groove PCSS in above tints

Finish Options

- Anodized finishes
- Electrostatically painted finishes
- Kynar finishes
- Custom architectural colors

System Size

- 10mm sheets are 23 in. wide. 20mm sheets are 13.11in. wide.
- Standard sheet stock up to 24 ft. long
- Custom sheet stock up to 39 ft. long
- Standard aluminum tube structure 1.5 in. x 2.5 in.

System Attachment

- Attaches to structure using perimeter channels and intermediate clips which are not visible

Recommendations

- Choose crystal, blue, green or bronze tint for obscure visibility of stud structure
- Choose opal to block visibility of stud structure
- Choose 10mm system for best complement of economy and aesthetics
