

Duo-Gard Translucent Interior Wall Systems

SERIES 2500 – TIW Batten Clip System

Smooth Façade - Flexibility

System Summary

- Continuous glazing facade
- Polycarbonate or aluminum batten clips (depending on span) for snap-in attachment
- Horizontal configuration for smooth radius in curved walls
- Vertical configuration for greater spans than Series 1500 - TIW
- Panels comply with tight corners
- Panels snap into batten attached to structure
- No visible fasteners
- Varying light transmission, depending on glazing tint
- Easy installation for reduced costs
- Demountable as desired

Glazing Options

- 8mm or 20mm PCSS
- Opal, crystal, blue, green, bronze PCSS

Finish Options

- Anodized finishes
- Electrostatically painted finishes
- Kynar finishes
- Custom architectural finishes

System Size

- 8mm or 20mm sheets are 23.75 in. wide
- Standard sheet stock up to 24 ft. long
- Custom sheets up to 39 ft. long
- Can be configured based on structural requirements

System Attachment

- Batten clips fasten to structure; panels snap-in securely
- No visible fasteners

Recommendations

- Choose crystal, blue, green or bronze for obscure visibility of stud structure
- Choose opal to block visibility of stud structure
