

Duo-Gard together with

Performance. Aesthetics. Economy. Architects and designers gain new advantages in all three with a collaboration announced by two industry leaders in glazing materials and systems technology. Duo-Gard Industries Inc. will provide complete turnkey systems and solutions for canopies, shelters, building facades and other exterior applications.

A new line, marketed by Duo-Gard, is named fusion and integrates 3form translucent polycarbonate glazing panels with Duo-Gard's engineered structural systems to create advanced aesthetic possibilities in *92 color options, three finishes and three thicknesses.*

The **collaboration** takes Duo-Gard's expertise in outdoor applications to a higher level of aesthetic diversity, while it moves 3form into new exterior territory, expanding the markets for both companies.

Let There Be Color

Bring translucency, color and custom design to your next project. Duo-Gard now offers the following options:

- 92 translucent colors
- 3 finishes including luster, veil & haze
- Thickness available in 1/4", 3/8" & 1/2"
